

Planarcap® NMB Filter

*Ultra-high particle loading capacity,
superior hard particle removal
capabilities, and gel retention
performance*

Planarcap® NMB filters offer an innovative solution for best-in-class, point-of-dispense slurry filtration with ultra-high particle loading capacity in sub-45 nm technology nodes. The advanced nanofiber continuous melt-blown (NMB) media technology enables superior hard particle removal and gel retention performance in CMP processes, reducing microscratches and extending filter lifetime. Planarcap NMB filters can be strategically installed at the final dispense point just before the slurry makes contact with the wafer.

APPLICATIONS

- Chemical mechanical planarization (CMP) processes
